Consultant Kyoung-Bae Kwon has been promoting the value of safety management at many industrial sites for the past 30 years. Mr. Kwon has provided consulting services for establishing and effectively operating safety management systems to major companies and organizations in a wide range of fields including chemical, semiconductor, automotive, aviation, shipbuilding, heavy industry, shipping, construction and public sectors. In addition to training, auditing and consulting related to safety management systems, he has conducted safety diagnosis of on-site facilities and processes, diagnosis of organizational safety culture, assessment of organizations' compliance with safety, health, and environmental laws and regulations as well as workplace internal audits, supporting clients' safety management to ensure safer workplaces.
